# Network IP Digital Media Player    ID# 516

**Operation Manual**

CONVERTERS.TV

**Introduction**

The Network IP Digital Media Player provides the solution for both file data transfer and update via the Internet and being able to access your picture, movie and audio files without a PC.
Fully compatible with most Internet network connections like Ethernet, Fixed IP address, ADSL PPPoE, Dynamic IP(DDNS) etc.
You can view all this on any TV display or monitor with audio. Fully remote controlled for easy selection of files and output displays.
**Features**

**The Network IP Digital Media Player has many great features including:**

1.  -NTSC/PAL selectable.

2.  -Supports Composite, S-Video and VGA Video displays.

3.  -Digital Audio output for connection to Audio Amplifier

4.  -Supports CF(Compact Flash) Card for media files.

5.  -Supports multiple Photo, Music and Movie file formats.

6.  -RJ45 connection for Internet connection.

**Some of the Network features include:**

7.  -Ethernet RJ-45, 10/100 Base-T.

8.  -Network Remote Control through IE Browser.

9.  -Embedded FTP Server (Upload, Delete, Download, Rename Files of CF Card.

10. -Network Services: HTTP(user interface),  FTP(manage files), PPPoE(Fixed IP address recommended) Dynamic DNS and Firewall Port forwarding-virtual IP addresses)

11. -Supports WIN 98SE, 2000, ME, XP (Microsoft IE 5.5/6)

12. -English Only Software operation.
